Injection  
**Mromont**  
(Meropenem USP)  
500mg & 1g I.V.

From Critical  
Moments to  
*Comfort*

Mromont

Mromont is the drug of choice for severe ESBL-E (Extended Spectrum Beta-Lactamase-producing Enterobacteriaceae) infections and is used to treat **bacterial meningitis, severe CAP (Community-Acquired Pneumonia), complicated UTI (urinary tract infection), complicated skin infections, and sepsis or septic shock.**

Mromont is manufactured in a dedicated, state of the art carbapenem facility

## MECHANISM OF ACTION

Meropenem is a broad-spectrum carbapenem antibiotic. It is active against Gram-positive and Gram-negative bacteria. Meropenem exerts its action by **penetrating bacterial cells readily and interfering with the synthesis of vital cell wall components, which leads to cell death**

## Key Features and Benefits of Mromont

### Broad-Spectrum Antibiotic:

Effective against a wide range of Gram-positive and Gram-negative bacteria.

### Convenient Dosage:

Administered intravenously, allowing for rapid therapeutic levels.

### Reasonable Price:

Offers a cost-effective solution for treating severe bacterial infections.

### Good Tolerability:

Well-tolerated in both children and adults with an acceptable safety profile.

### Coverage in Various Conditions:

Treats complicated skin and skin structure infections, complicated intra-abdominal infections, and bacterial meningitis

### USFDA Approved for Children:

Approved for use in children aged 3 months and older with bacterial meningitis and complicated intra-abdominal infections.

### High Efficacy:

Demonstrated efficacy in clinical trials for treating serious bacterial infections

### Rapid Action:

Provides immediate high levels of medication in the bloodstream

## DOSAGE & ADMINISTRATION

INFECTION	ADULTS (DOSE TO BE ADMINISTERED T.I.D.)	CHILDREN FROM 3 MONTHS TO 11 YEARS OF AGE AND UP TO 50KG BODY WEIGHT T.I.D.
Severe pneumonia including hospital and ventilator-associated pneumonia.	500mg or 1g	10 or 20mg/kg
Broncho-pulmonary infections in cystic fibrosis	2g	40mg/kg
Complicated urinary tract infections	500mg or 1g	10 or 20mg/kg
Complicated intra-abdominal infections	500mg or 1g	10 or 20mg/kg
Complicated skin and soft tissue infections	500mg or 1g	10 or 20mg/kg
Acute bacterial meningitis	2g	40mg/kg
Management of febrile neutropenic patients	1g	20mg/kg
Intra and post partum infections	500mg or 1g	-
